We like to think of ourselves as an affordable “boutique” wedding photography studio. We work closely with our clients from the start. While we strive to capture a complete photographic expression of the beauty and joy of your wedding day, we love to capture images that reflect your personality: those personal expressions of love and celebration from yourselves as well as your family and friends. We will work with you as a team to produce a beautiful and complete collection of images. **We are generous regarding your image rights.** We are dedicated full time professional photographic artists – not dilettantes. We treat our clients as our friends: we respect them, we encourage them to inspire us, we endeavor to produce art together to be enjoyed for generations. While we aren't the least expensive studio out there, we are the most affordable studio offering the quality and personalized service we provide. Back when they ranked their studios, both The Knot and WeddingWire ranked us at #1 in the metro area for studios starting at under \$2000 and #3 at any price at all. They no longer offer studio rankings, but the reviews are still there - and we have never received under a five-star review in our entire history – anywhere – on hundreds of reviews.

Image Editing/Processing Statement:

Besides excellent image capture by true professional photographic artists, we also offer a unique service in the way of our image color processing/editing. We would probably have great reviews regardless – but I firmly believe the reason we have perfect reviews over the last seven years is the quality of our image editing and color processing.

We take that as seriously as the image capture aspect of our photographic art. We consider it a photographic art equal in importance to the image capture aspect of our art. And it is actually way more time consuming. We color process/edit for at least two hours for every hour we shoot – probably two and a half hours on average. And that is with a great computer and a super-efficient process and work flow and decades of experience to facilitate the endeavor.

Most studios don't even try to offer the quality we offer in color processing/editing regardless of price. It is extremely difficult to do consistently well – in fact, a rare talent – and always extremely time consuming even in its most efficient production. Even some of the finest studios in the area farm-out this aspect of their art to overseas contractors for this reason. They then have little control and their editing quality doesn't compare.

Weddings are especially challenging to photographic editors because the color balance and the nature of the light sources are constantly changing and can be anything this world of ours offers in the way of lighting sources. And sometimes that multitude of light sources can all be seen in one wedding or even within one image. A single image can have a 3000 degree temperature difference in the light sources present within it. That is actually not unusual. Hopefully, the client never sees the challenges that come the editor's way. They are just happy with the results of his work - ours certainly are.

We don't expect the editing is totally done when we turn the images in to a client. We understand the clients will want to cull the images to their favorites – usually several hundred favorites. But each image we provide will be worked on extensively. And even processed more than once. I process from images captured in proprietary raw format to full sized jpgs and then review all the jpgs and often process them again with additional refining touches.

The ultimate resulting collection is greatly appreciated by our clients. They mostly just take the editing/processing it took to produce the quality of their image collection for granted. They just love their images is all. That's OK with us – we take our satisfaction in the hundreds of universal 5 stars our clients have given us in reviews. That is a fine reward.

The satisfaction of our clients means a lot to us.

Italian Leather GraphiStudio Album:

GraphiStudio is located the foothills of the Alps of Northern Italy. Besides a modern production facility, they have a beautiful castle: **The Ceconi Castle**.

It is impossible to exaggerate the quality of these albums – we have carried them for over 20 years and never had a single one come back with any defect. Their printing is incredibly lush. The spreads just glow. They open totally flat and the center fold is basically unnoticeable. True custom design is included with these albums – extreme artistic care in every way. We take a lot of time to make these “just right” works of art and craftsmanship. Each image is refined individually to the max even before the layout and final design work begins. Our clients are very happy with their albums.

Our Album Design Philosophy and Process (Enhanced Elegance):

We custom design albums for our clients with a simple artistic philosophy:
We want to maximize the impact of each individual photographic image and not detract from that art while placing those images into an elegant presentation.
We start by refining your selected images for your album to the max in concert with you. Then we create a beautiful layout for you to consider and refine and approve. Finally, we refine the presentation of that layout artistically and the design is completed when you are happy with that final design. We refer to this design style as “Enhanced Elegance”. These elegant designs are then presented in a gorgeous real Italian Leather Album. The presentation can be further enhanced, and the album protected by a fine engraved wood cover and linen-lined box - see image below.

Graphi Studio offers over 50 different Italian leather types and colors including the Italian “fashion” leathers that the \$500 Italian shoes are made of.
