We offer the Best Quality/Affordability Balance Possible:

The quality of our professional talent and our dedication:

We are all dedicated professional artists. We are not dilettantes pretending to be such. Currently, five of us have university degrees in photography or teach photography at prestigious local universities. The only one who does not, myself, has over thirty years of experience in wedding photography. We are professional artists because we love to create art and value your sponsorship in that regard. It is how we make our living. Without your sponsorship, we could not be professional artists. So, we better be good at it. We are not doing this to get rich, but to make a living and for the joy of sharing our art in helping you capture one of the most important, joyous days of your life. That is very rewarding in itself, and an honor and we treat it as such.

Please view our extensive portfolio section on our website (dreamlightart.com) to get a feel for our individual art and styles. You will find each wedding there unique – we are artists, not robots following a repetitive image script for each wedding. We try to strike a nice balance between being entirely creative and gathering all the unique ingredients presented to us at each of our weddings in terms of personalities, the environment (the potential scenes), the available light, our professional light augmentation, if necessary, and all within the restriction of the time available to us – to create unique images for you that are totally fresh for every wedding we shoot. You will find some repetitive themes in our portfolios – but you will also find many unique qualities in every wedding we shoot. You should get a feel for the fact that we can capture for you an artistic rendition of the unique story of your day in light – the very definition of photography in the original Greek. We capture in RAW mode – meaning 30+ megabyte files for each image.

The quality of our image processing is rare in the metro area at any price:

Besides excellent image capture by truly professional photographic artists, we also offer an almost unique service in the way of our image color processing/editing. We would probably have great reviews regardless – but I firmly believe the reason we have had hundreds of nothing but perfect reviews over the last eight years is also due to the quality of our image editing and color processing.

We take our image processing as seriously as the image capture aspect of our photographic art. We consider it a photographic art equal in importance to the image capture aspect of our art. And it is actually way more time consuming. We image process for around two and a half hours for every hour we shoot. Often more. And that is with a great computer and a super-efficient process and workflow and decades of experience to facilitate the endeavor. We process from RAW images to finished JPGs.

Most studios don't even try to offer the quality we offer in image processing - regardless of price. It is extremely difficult to do consistently well – in fact, a rare talent – and

always extremely time consuming even in its most efficient production. Even some of the finest studios in the area farm-out this aspect of their art to overseas contractors for this reason. They then have little control and their editing quality doesn't compare. Or they use pre-packaged filters to create images that may be artistic, but have little resemblance to reality here on planet Earth. Our images are lush and real. Every single one.

The ultimate resulting collection is greatly appreciated by our clients. Though they might take the editing/processing it took to produce the quality of their image collection for granted - they just love their images and that is our goal. That's OK with us – we take our satisfaction in the over three hundred universal 5 stars our clients have given us in reviews. That is a fine reward. The satisfaction of our clients means a lot to us.

Our Affordability is unmatched in the metro area for the Quality we offer:

You can actually pay for just the amount of quality photography you need with us!! Which makes us rare for quality wedding photography services. We charge by the hour from as little time as you want to whatever mega-event you have in mind. At the 12 hour mega-event level we may not be such a great bargain dollar-wise but we are a great value. **But anywhere below that 12 hour level we become increasingly the best value you will find anywhere at any price.**

And we don't charge you for expensive Hollywood special effects that may be stunning, but not natural-looking at all. If that is what you want – go for it!! We keep things relatively simple while totally professional for natural-looking beauty. We do so intentionally – because simplicity is naturally beautiful. It is nature's own way. It is our art. Hollywood special effects can stay in Hollywood as far as we care. Take another look at our portfolio images – they are naturally beautiful without expensive special effects or unnatural image processing. We think we have the best image processing in the metro area, but it is also not dependent on “special effects” – it is again simply natural beauty – perhaps selectively enhanced because we are professional artists after all – but they look very natural and very beautiful – that is our art.

The heart of our exceptional affordability lies in events that run anywhere from 2-8 hours in length of photography service needed. You can hire us for a 10 hour event and get a free hour (11 hours total) but we shine at 2-8 hour events as far as affordability for quality photography services. We don't have a \$2500 minimum charge for minimum service like many quality studios in town. You can actually pay for just the amount of quality photography you need with us!! And you can trust us to give you exactly the same quality of service we provide everyone who hires us. Please remember, we have universal 5 star reviews and hundreds of them!

You will not find a better Quality/Affordability value for 1-8 hour events in the metro area!

We charge only what we need to for our art and what is fair – what we know is the best balance of quality art, service, and price. We work tirelessly to achieve that. It is a carefully built-in feature of our art. Our over 300 universally perfect 5-star reviews online attest to our success in that pursuit !!
